## The Secret of Health is in the Water We Drink

### 健康的秘诀在于饮水之中

Among all things that we consume, water is the most essential as it makes up 60% to 70% of our body. About 80% of human blood and about 90% of organic cells are also composed of water. Therefore, the fact that the water we drink can affect health is undoubted. However, there are many types or different qualities of water that are available. Certain types of water can be harmful to us while some can be beneficial to our health, aiding in our body functions.

我们所摄取的饮食当中，水是至为重要，因为身体有60%至70%的构成是水。人体血液里约80%有机细胞中约90%以上亦是由水组成。

因此，我们饮用的水会影响健康是毋庸置疑的事实。然而，饮用水的种类繁多，性质亦各有不同。长期饮用某些水对我们健康有害；反之，饮用一些水则对健康有益的水，能帮助人体发挥功能。

## Ordinary Water Vs. eDROPS®

### 普通水和eDROPS® 生命水的区别

Ordinary water can easily be ionized and chemically changed by the environment (through oxidization, disintegration, rotting, propagation of bacteria and pollution by harmful substances). Whereas, Korean made eDROPS® is a high-energy bio-revitalize concentrate that contain beneficial properties; infinitesimal trace amount of ferric/ferrous salt with antioxidant effect. It helps neutralize harmful chemicals inside our body, inhibits the growth of bacteria, prevent cell oxidation by neutralizing free radicals; therefore, promoting a better environment for our body cells. eDROPS® is easy to carry and can add to our drinking water and beverages wherever we go. Besides, we can apply eDROPS® directly on wounds, bath and skin or add into bath water.

普通水易被周围的环境污染或离子化，继而改变其化学性质（经过氧化、分解、腐烂、细菌繁殖以及有害物质的污染等）。

相反，韩国生产的 eDROPS® 中的超微量二价/三价铁盐 (ferric/ferrous salt) 脂质复合体（含高阶能量）属性，帮助抑制病原微生物繁殖或中和各种有害物质（重金属离子其它杂质）；帮助抗氧化，由此促进人体细胞内环境。eDROPS® 便于携带，任何时间都可以加入饮水或饮料中；此外，还可以直接涂抹于伤口，皮肤，也可滴入盆浴水中。

## 含有最小的水分子簇

contains the smallest clusters of water molecules

## 核磁共振波谱佐证

Nuclear Magnetic Resonance(NMR) Spectroscopy Proven

可以快速穿透细胞从而增进新陈代谢！  
It can penetrate into cells easily to aid in metabolism!

**改善生命体功能**  
**Improve Bodily Functions**  
例如血液循环运动，消化和吸收  
such as blood circulation movement, digestion and absorption

**抑制有害金属离子**  
**Inhibit Toxic Metal Ions**  
抑制有害功能金属离子  
Inhibit functions of toxic ions and heavy metals

**获得再生能力**  
**Regeneration Ability**  
帮助恢复细胞损伤和组织  
Help restore damaged of cells and tissues

# 作用 Benefits

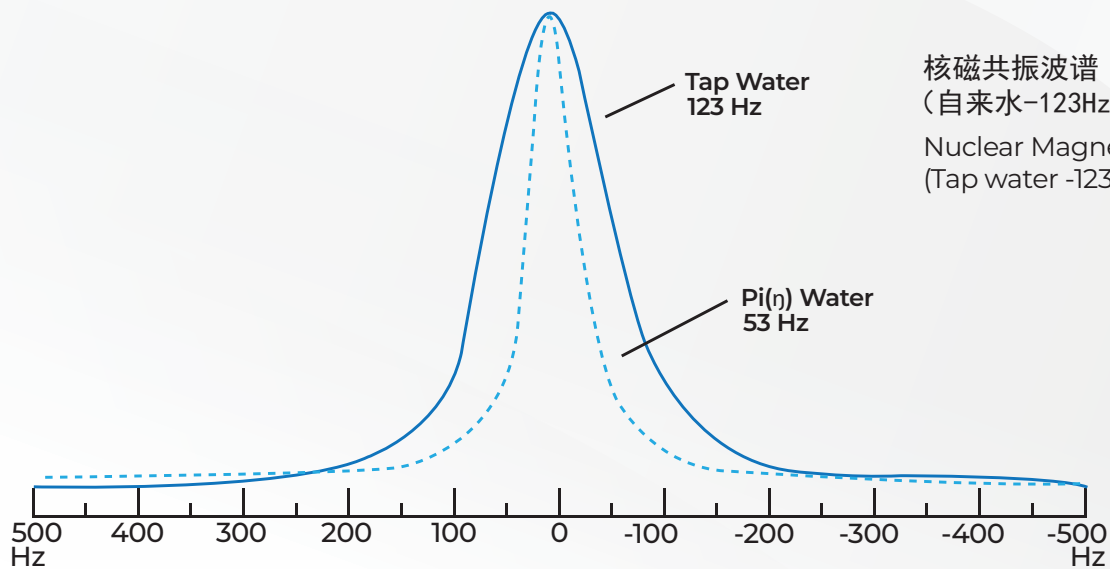

**富含养分**  
**Contain Abundante Oxygen**

**净化环境**  
**Purification of The Environment**  
改善不良水质和土壤  
Improves the quality of bad water and soil

**预防血斑（血栓开成）**  
**Natural Growth**  
控制细胞间质的钙密度  
Control calcium density of intracellular

**抗氧化及延缓衰老**  
**Anti-Oxidation and delay aging**

**抑制病原生物扩散**  
**Inhibit Pathogenic Organisms Proliferation**  
阻止病毒细菌增殖  
Virus and bacteria propagation

© Drops® V. 0水包含较小水分子簇（使其可以容易进入体内细胞运送营养并清除新陈代谢的废物）。

© Drops® V.O water contains small water molecule cluster (which allows it to easily enter cells in the body to deliver nutrients and to remove waste products of metabolism).
